CHANDRATAL

One of the most exciting campings in Himalayas is the stay near **Chandratal (Moon Lake)**, the source of Chandra River. One gets magnificent views of glaciers and peaks of Mulkila & Chandrabhaga ranges from here. The Lake's crystal clear water reflects the massive glaciers. Incredibly changing colors with the passage of day, peaceful and sublime, the lake is simply enchanting. The Chandra River joins Bhaga River few kilometers down the valley at Tandi and forms **Chenab**.
